SITEFINITY TRAINING FOR SYSTEM ADMINS

Training Outline

TRAINING DETAILS

SUMMARY

This training is intended for system administrators who oversee hosting infrastructure, staging, testing, and other admin related Sitefinity settings. Additionally, we would present all relevant Sitefinity functionality for system administrators.

The training is always delivered by senior Sitefinity consultants who would flexibly adjust to meet the needs of both beginner and advanced system administrators alike.

YOU WILL LEARN

- Sitefinity functionality relevant to system administrators
- Best practices for Sitefinity hosting infrastructure setup
- Performance optimization best practices
- How to setup development staging
- How to setup content staging
- Best practices for automated testing
- Best practices for Sitefinity Multisite setup
- How to manage security, users, and roles
- Best practices for redundancy and backup
- Sitefinity tools for error recovery
- Managing workflows and content lifecycles
- Manage resource files
- Manage Sitefinity settings related to system administration

TARGETED AUDIENCE

System administrators in charge of managing general hosting infrastructure, staging, testing, and admin related Sitefinity settings.

DURATION

1 day (8 hours with 60-minute lunch break and 2 short breaks)

TRAINING OUTLINE
